Dear Hiring Manager

I am excited to apply for a position with your organisation. As a Crisis Intervention Associate with experience supporting individuals experiencing mental health crises, suicidal ideation, and emotional distress, I bring a unique combination of behavioral health expertise, analytical thinking, and a passion for improving outcomes through both compassionate care and data-driven decision-making.

In my current role with The Samaritans, I provide crisis intervention, conduct suicide risk assessments, develop collaborative safety plans, de-escalate high-risk situations, and maintain accurate, confidential documentation while adhering to organisational protocols. I have also been selected to train and support new Crisis Intervention Associates, reinforcing crisis response techniques, documentation standards, and best practices.

Alongside my behavioural health experience, I have developed technical skills in data analytics, spreadsheet analysis, SQL, and data visualisation. I actively build and maintain a GitHub portfolio showcasing data analytics projects, where I apply data cleaning, analysis, visualisation, and problem-solving techniques to real-world datasets. These skills complement my psychology background by enabling me to identify trends, interpret data, and support informed decision-making.

I have completed specialised training through the 988 Suicide & Crisis Lifeline, including crisis counseling, suicide risk assessment, safety planning, cultural responsiveness, and intervention for imminent suicide risk. Additional certifications in CPR/AED, trauma-informed care, child welfare, mandatory reporting, and violence prevention have strengthened my ability to serve diverse populations with professionalism and empathy.

I am currently completing my Bachelor of Science in Psychology at the University of Houston–Downtown (expected December 2026). My coursework in psychological statistics, advanced research methods, abnormal psychology, and human behaviour has strengthened my foundation in research, data interpretation, evidence-based practice, and behavioural science.

I am confident my blend of crisis intervention experience, leadership, analytical skills, and commitment to continuous learning would make me a valuable addition to your team. Thank you for your time and consideration. I welcome the opportunity to discuss how my experience and skills can contribute to your organisation's success.

Respectfully,

Kay Howse
